

## Federal Technical Data Solution (FedTeDS)

### *Overview*

The Federal Technical Data Solution (FedTeDS) system is an e-Gov initiative within the Integrated Acquisition Environment (IAE). It is managed by the Department of Defense (DoD) on behalf of the IAE. FedTeDS provides a Web-based system that disseminates acquisition-related sensitive but unclassified (SBU) information associated with an active acquisition or solicitation to Federal government vendors. Examples of SBU information can include construction drawings, building layouts, security system installations, and any other information related to publicly accessible government solicitations, but that contains contents that, when aggregated and obtained, could become a threat to national security.

A Federal Acquisition Regulation (FAR) case instructing the Federal-wide use of FedTeDS was approved in May 2006.

### *Program Mission*

FedTeDS provides a single solution to disseminate acquisition-related sensitive but unclassified information associated with an active acquisition or solicitation to Federal government vendors. FedTeDS is a system within the Federal eGov Integrated Acquisition Environment (IAE) initiative.

### *Benefits*

FedTeDS and its use:

- Provides a secure site for uploading and disseminating sensitive but unclassified documents;
- Links with the Federal Business Opportunities (FBO) system to provide vendors an integrated environment;
- Interfaces with the Central Contractor Registration (CCR) system to obtain the primary source of vendor validation;
- Interfaces with Defense Logistics Information Services' Joint Certification Program to obtain export control vendor validation;
- Integrates with Federal Business Opportunities (FedBizOpps.gov) to provide vendors with links to FedTeDS for solicitations that have sensitive but unclassified information associated with them; and
- FedTeDS Policy Working Group has drafted Guidelines for sensitive but unclassified information for Office of Management and Budget (OMB) to issue that all users posting and accessing sensitive but unclassified information must adhere to.

### **Fast Facts:**

#### *FedTeDS*

FedTeDS is a system of the Integrated Acquisition Environment/General Service Administration (IAE/GSA) and the Business Transformation Agency's Defense Business Systems Acquisition Executive (DBSAE) directorate. The DBSAE directorate is responsible for driving the successful implementation of DoD systems and initiatives in support of the Department's Business Transformation and Office of Management and Budget (OMB) e-Gov goals. The BTA's mission is to develop, coordinate, and integrate projects, programs, systems and initiatives providing DoD Enterprise-wide business capabilities to the warfighter.
